Lisa Law Design Services specializes in making your home, office or landscape more welcoming, comfortable, and functional through Feng Shui, design, color and organization.

Feng Shui, meaning wind and water, is the ancient art of placement. Based on thousands of years of Chinese philosophy, it has grown in popularity due to the extraordinary results it can bring. It believes that all things are connected and that when the environment is balanced and filled with positive energy it can support and enhance life goals and lead to a feeling of tranquility. Practicing Feng Shui can help improve health, prosperity, relationships and an overall feeling of well-being.

Lisa Law is available for Feng Shui consultations in homes, businesses and landscapes. She works with all design styles and budgets. She can help fix spaces that feel uncomfortable, help organize and de-clutter, help choose paint or upholstery colors and help work within your home to create a sense of tranquility and balance. She can also help arrange your home so that it's welcoming and comfortable to potential buyers and for home parties. Call her at (603) 566-6109 to arrange a personal consultation or book a workshop for your next group function. She looks forward to working with you!
